Lakhandur Dist. Bhandara, Maharashtra.

SUMMARY

Computer Science Engineering graduate with hands-on project experience in Python, SQL, Data Science, Machine Learning, and Data Analytics. Experienced in building end-to-end data processing pipelines, data cleaning, data transformation, feature engineering, predictive modeling, and model evaluation. Familiar with structured data, database management, REST API integration, and deploying machine learning applications using Streamlit and Joblib. Strong foundation in analytical problem-solving, data-driven decision-making, and developing scalable data solutions for AI/ML applications.

TECHNICAL SKILLS

- **Programming:** Python, C++
- **Data Science & Management:** Pandas, NumPy, data cleaning, data transformation, exploratory data analysis (EDA), statistical analysis, structured data, ETL/ELT Fundamentals
- **Machine Learning:** Scikit-learn, LightGBM, Classification, Regression, Clustering, Feature Engineering, Feature Scaling
- **Model Optimization:** Optuna, GridSearchCV, Hyperparameter Tuning, Cross-Validation
- **Time Series:** Forecasting, Trend & Seasonality, Lag Features, Rolling Windows, Recursive Forecasting
- **Model Evaluation:** MAE, RMSE, WAPE, Accuracy, F1-Score, R^2
- **Visualization:** Matplotlib, Seaborn, Power BI, Streamlit.
- **Databases:** SQL, MongoDB
- **Backend & APIs:** FastAPI, Node.js, Express.js, REST APIs
- **Web:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- **Tools:** Git, GitHub, Jupyter Notebook, Excel, Joblib

INTERNSHIP EXPERIENCE

React JS Intern – Celebal Technologies (Remote) **06/2025 –08/2025**

- Developed responsive interfaces using **React.js, JavaScript, HTML5, and CSS3**.
- Created reusable UI components and integrated **REST APIs** into application workflows.
- Applied **Git/GitHub** for version control and collaborative development.
- Improved application usability, responsiveness, and frontend performance.

Frontend & MERN Stack Intern – EY GDS & AICTE Next Gen Program (Remote) **12/2024 – 01/2025**

- Build full-stack web applications using **Node.js, Express.js, MongoDB, and React.js.**
- Designed and integrated **RESTful APIs** for frontend-backend communication and application workflows.
- Executed database-driven features using **MongoDB,** including data storage and retrieval.
- Integrated APIs and authentication functionality while maintaining clean and maintainable code.

PROJECTS

`AI-Powered Demand Forecasting & Inventory Optimization System. GitHub Demo

- Developed an end-to-end data processing and demand forecasting pipeline for 1M+ sales records across 1,115 stores.

- Performed data preprocessing, data cleaning, transformation, and feature engineering to prepare structured datasets for machine learning.
- Engineered calendar, promotion, lag, and rolling-window features for predictive analytics and time-series forecasting.
- Optimized LightGBM models using Optuna and evaluated performance through chronological rolling cross-validation.
- Achieved approximately 7.35% mean WAPE across four validation folds and benchmarked forecasting models against Exponential Smoothing and ensemble approaches.

Customer Churn & Revenue Risk Intelligence System GitHub

- Conducted data cleaning, exploratory data analysis, and feature engineering to identify customer churn patterns.
- Developed a machine learning classification workflow to identify high-probability churn customers.
- Analyzed customer lifetime value and revenue contribution to assess potential revenue exposure.
- Transformed structured customer data into actionable insights to support data-driven business decisions.

Lecture Engagement Pattern Analyzer GitHub Demo

- Developed end-to-end machine learning workflows for student performance classification and quiz-score regression.
- Implemented data preprocessing, encoding, feature scaling, and feature engineering to prepare model-ready datasets.
- Optimized model performance using GridSearchCV and evaluated results using Accuracy, F1-score, MAE, RMSE, and R^2.
- Deployed trained machine learning models through Streamlit and Joblib for interactive predictions.

EDUCATION

B. Tech in Computer Science Engineering
Bansal Institute of Research & Technology Science, Bhopal (RGPV) **2022–2026**
CGPA: 8.10

Class XII – Science
Dr. Babasaheb Ambedkar Mahavidyalaya, Lakhandur (Maharashtra) **2021–2022**
Percentage: 71.58%

Class X
Shivaji Vidyalaya, Lakhandur (Maharashtra) **2019–2020**
Percentage: 79.89%

CERTIFICATIONS

- **Data Analysis with Python** – freeCodeCamp| Online **2026**
- **SQL (Basic)** – HackerRank | Online **2024**
- **Scientific Computing with Python.** – freeCodeCamp | Online **2024**

SOFT SKILLS

- Leadership & Teamwork.
- Analytical Thinking & Complex Problem-Solving
- Critical Thinking & Root Cause Analysis
- Adaptability & Continuous Learning
